## Jolana *Tornado*

*The hollow body electric guitar Jolana Tornado series has come back after many years. Its roots date back to the original that was produced in 1963 and that was successfully sold at home in Czech lands, as well as on the foreign markets. The current model is created using modern materials and parts, with upgraded body construction, set neck and original body design. But the Tornado keeps its original headstock design and guitar unit arrangement. In our offer we present you with a choice of brand pickups, whose strong sound and wide range of tones elevate the model to the real masterpiece.*

Hollow body electric guitar with original Tornado design

Rock maple set neck and original Tornado headstock
